

2424

KX-1901A

SERVICE MANUAL

US Model

Chassis No. SCC-384B

E.W.

May, 1983

HF CHASSIS

SPECIFICATIONS

The adjustment procedures are not contained in this manual.

When performing the adjustments, refer to the separate-volume "ADJUSTMENT MANUAL".

Color system	NTSC	Output	SPEAKER
Picture tube	Trinitron tube		Accepts speakers of 8-16 ohms
	19-inch picture measured diagonally, 100-degree deflection	Power requirements	120V ac, 60 Hz
		Power consumption	142 W (max.) 93 W (average)
Inputs	VIDEO INPUT (phono jack)		1.8 W (in standby condition)
	1 V p-p, NTSC, 75 ohms, unbalanced, sync negative	AC outlet	Switched, max. 250 W
	AUDIO INPUT (2 phono jacks)	Dimensions	Approx. 504 x 452 x 480 mm (w/h/d)
	726mVrms (100% modulation), 47 kilohms		(19 7/8 x 17 7/8 x 19 inches)
	CONTROL INPUT (minijack)	Weight	Approx. 33 kg. (72 lb 12 oz)
	5V p-p	Accessories supplied	Video Cable VMC-1S
	MULTI INPUT (8-pin DIN)		(phono plug to phono plug, 1.2 m)
	Same as the above VIDEO/AUDIO/CONTROL INPUTS		Connecting Cord RK-105A
			(miniplug to 2 phono plugs, 1.5 m)
			34-pin socket 1 set

Design and specifications subject to change without notice.

TRINITRON®
COMPONENT TV
SONY®

MON

RGB MULT INPUT (34-pin plug)

Pin No.	Signal	Signal level
1	+5 V power supply	} Total 100 mA
2	+5 V power supply	
3	Audio (R) input ground	
4	Ground	
5	Remote control ground	
6	Composite video output ground	
7	Audio (L) input ground	
8 1 16	Ground	
18	EXT/INT mode sync switch	High state (open): EXT sync Low state (ground): INT sync
20	Audio (R) input	726 mVrms (100% modulation), 47 kilohms
21	Analog/digital mode select	High state (open): Analog signal (0.7 Vp-p) Low state (ground): Digital signal (TTL level)
22	Remote control output	
23	Composite video output	1 Vp-p, NTSC 75 ohm terminated, unbalanced, sync negative
24	Audio (L) input	726 mVrms (100% modulation) 47 kilohms
25	Red input	Positive polarity (1) Analog signal (0.7 Vp-p, 75 ohm terminated, non sync) (2) Digital signal (TTL level) ● (1) or (2) is selected by the pin 21.
26	Green input	
27	Blue input	
29	Blanking input	Positive polarity High state (1–3V), 75 ohm terminated Low state (0–0.4V), 75 ohm terminated ● Displays RGB inputs only at high state or RGB inputs superimposed directly on composite video inputs at low state
30	H. sync or composite sync	Negative polarity (1) 1 Vp-p, 75 ohm terminated (2) TTL level ● (1) or (2) is selected by the pin 21.
31	V. sync	Negative polarity TTL level
32	Half blanking input	Positive polarity TTL level ● Active with blanking input (pin 29) at low state ● Decrease the contrast of composite video inputs in superimposed mode
33	RGB/NORMAL mode select	High state (5 V): RGB inputs Low state (ground): composite video inputs ● The NORMAL/RGB button on the front panel does not function at high state.
34	Audio select	High state (5 V): audio inputs from the RGB MULTI INPUT connector Low state (ground): audio inputs from the AUDIO INPUT jacks or MULTI INPUT connector
14, 17, 19, 28	Not in use	

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY SHADING AND MARK  ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY. CIRCUIT ADJUSTMENTS THAT ARE CRITICAL TO SAFE OPERATION ARE IDENTIFIED IN THIS MANUAL. FOLLOW THESE PROCEDURES WHENEVER CRITICAL COMPONENTS ARE REPLACED OR IMPROPER OPERATION IS SUSPECTED.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
6. Check the line cord for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
7. Check the condition of the monopole antenna (if any).
Make sure the end is not broken off, and has the plastic cap on it. Point out the danger of impalement on a broken antenna to the customer, and recommend the antenna's replacement.
8. Check the B+ and HV to see they are at the values specified. Make sure your instruments are accurate; be suspicious of your HV meter if sets always have low HV.
9. Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

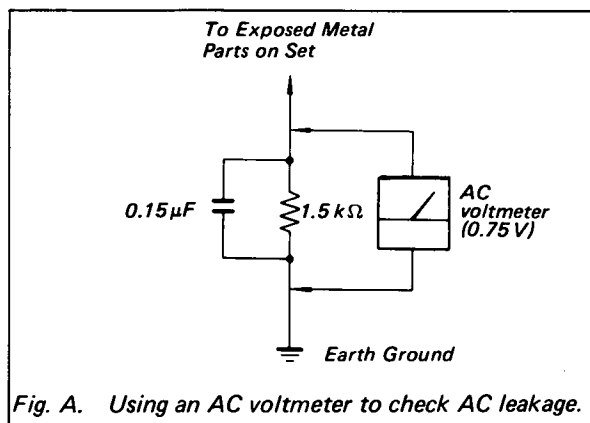

Fig. A. Using an AC voltmeter to check AC leakage.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

HOW TO FIND A GOOD EARTH GROUND

A cold-water pipe is guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground. If the retaining screw is to be used as your earth-ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms. If a cold-water pipe is not accessible, connect a 60–100 watts trouble light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side of the line, the lamp should light at normal brilliance if the screw is at ground potential. (See Fig. B)

Fig. B. Checking for earth ground.

SECTION 1 GENERAL

1-1. FEATURES

A color video monitor designed for a variety of uses with a Sony Component TV tuner, Sony Betamax videocassette recorder, video camera, character generator, microcomputer, etc.

DYNAMIC PICTURE™ system adjusts picture contrast automatically to produce more detail in both bright and dark areas of every scene.

DYNAMIC COLOR™ system for superior color reproduction with natural facial color tones and dazzling whites.

Colorpure Filter that produces fine picture detail without color spill or color noise.

Two built-in audio amplifiers provide dynamic sound from an externally connected speaker system (optional).

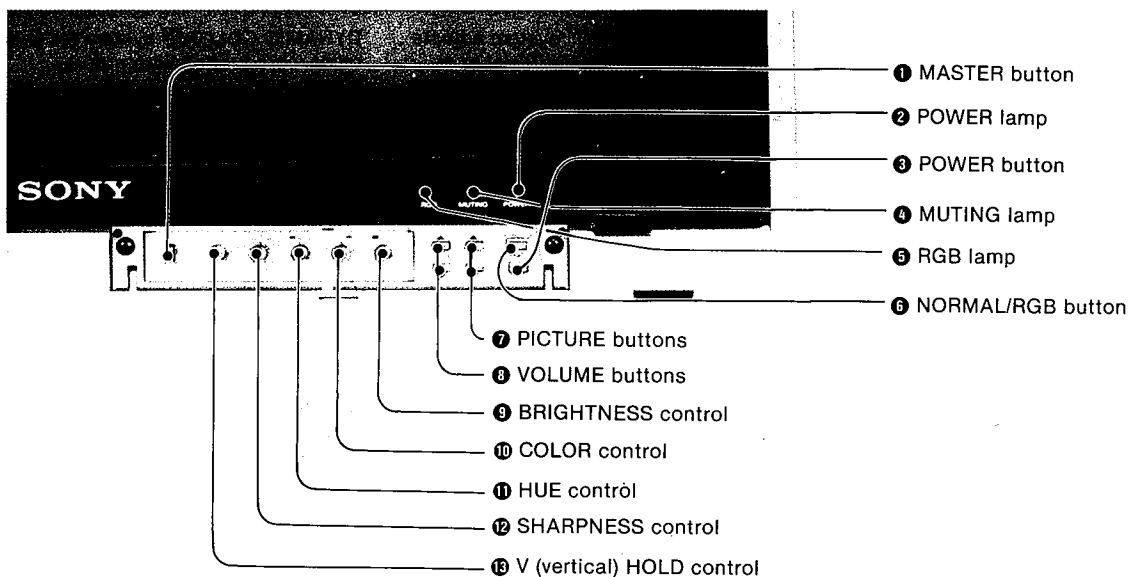

When the Component TV is used with a Component TV tuner, the volume, picture and power can be controlled from the tuner or the Remote Commander (supplied with the tuner).

Smoked glass over the picture tube for a glare-free picture with optimum contrast.

ECONOQUICK™, energy-saving quick-start system.

1-2. LOCATION AND FUNCTION OF PARTS AND CONTROLS

14 RGB MULTI INPUT connector (34-pin plug)

This connector allows a character generator, microcomputer, or a special adaptor for future videotex/teletext having digital/analog RGB outputs to be connected.

The connector cover has been attached to this connector at the factory. When this connector is not in use, keep the cover attached.

When such equipment having digital/analog RGB outputs is connected to this connector, disconnect the connector cover and proceed as follows by using the supplied 34-pin socket.

34-pin socket parts

BV3 × 8 screws (2)

BV3 × 10 screws (2)

Cord clasper

Socket contacts
(17 × 2)

Position number	Signal to be connected
1, 2	+5V power supply
3	Audio (R) input ground
4	Ground
5	Remote control ground
6	Composite video output ground
7	Audio (L) input ground
8*, 9*, 10*	Ground
11	Ground
12*, 13*	Ground
14	Not in use
15*	Ground
16	Ground
17	Not in use
18	EXT/INT mode sync switch
19	Not in use
20	Audio (R) input
21	Analog/digital mode select
22	Remote control output
23	Composite video output
24	Audio (L) input

26*	Green input
27*	Blue input
28	Not in use
29*	Blanking input
30*	H. sync or composite sync
31*	V. sync
32	Half blanking input
33	RGB/NORMAL mode select
34	Audio select

*For No. 8 and 25, 9 and 26, 10 and 27, 12 and 29, 13 and 30, or 15 and 31 connections, use a twisted-pair lead when the signal level is TTL, or a 75-ohm coaxial cable when the signal level is 1 V p-p.

(1) Solder each lead to a socket contact.

1. Place the lead on the contact as illustrated.

2. Fix the lead.

3. Tighten the tabs slightly.

4. Solder the conductor.

Take care not to solder past the point indicated by the dotted line.

5. After soldering, separate the contact by moving it upwards and downwards.

(2) Connect the socket contacts to the correct positions. Refer to the chart.

Align the contact and read for easier insertion.

For positions 18-34, insert with the flat side upwards.

For position 1-17, insert with the flat side downwards.

(3) Assemble the socket.

1. Attach the socket to the cover B.

with the positions 1-17 upwards

Engage the projections with the holes.

2. Attach the cover A to the socket with the 2 shorter screws.

Engage the projections with the holes.

3. Attach the cord clumper with the 2 longer screws.

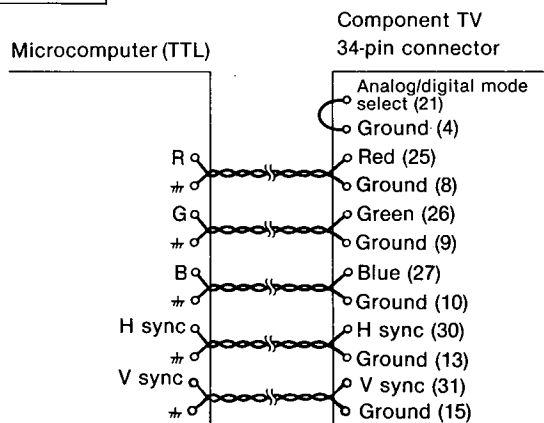

(4) Connect the socket to the RGB MULTI INPUT connector.

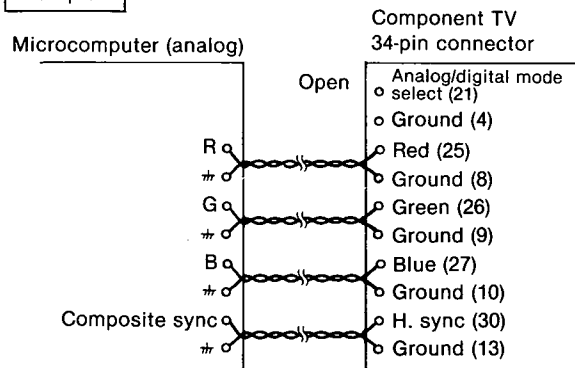

Engage the projection with this slot.

For the signal specifications, see page 2 .

Example 1

Example 2

15 AUDIO INPUT jacks (phono jacks, L-white, R-red)

Connect to the audio outputs of a Sony Betamax or U-matic video cassette recorder, Sony Component TV tuner, etc.

Connect the L and R channels properly. If the recorder is monaural, connect the audio output of the recorder to these two jacks with the RK-105A Connecting Cord (supplied) and the PC-5A Plug Adaptor (phono plug to minijack, optional), if required.

16 VIDEO INPUT jack (phono jack, yellow)

17 INPUT LEVEL control

Connect to the video output of a Sony Betamax or U-matic video cassette recorder, Sony Component TV tuner, video camera, etc. with the VMC-1S Video Cable (supplied).

The input level of the video signal from this jack can be adjusted with the INPUT LEVEL control.

Normally set the control to the center detent position.

If the picture contrast is too weak or too strong, adjust the level (min. 0.5V p-p, max. 2V p-p) by turning the control clockwise or counterclockwise with a screwdriver.

18 CONTROL INPUT jack (minijack)

When the set is used with a Sony Component TV tuner equipped with a control output connector, connect as illustrated with the RK-69A Connecting Cord (optional).

The volume and picture can be adjusted and the power can be turned on or off using the controls on the TV tuner or the Remote Commander (supplied with the tuner).

19 MULTI INPUT connector (8-pin DIN)

Connect to the MULTI OUTPUT (8-pin DIN) connector on a Sony Component TV tuner with the VK-2D Video Cable (supplied with the tuner, 2 m). The audio, video and control signals can be connected simultaneously with this cable.

The volume and picture can be adjusted and the power can be turned on or off using the controls on the TV tuner or the Remote Commander (supplied with the tuner).

Engage this projection with this slot.

To disconnect, push this button.

The VK-5DX Video Cable is available optionally for extending the VK-2D.

Caution: Use either the VIDEO/AUDIO/CONTROL 15 16 18 jacks or the MULTI INPUT connector, but not both simultaneously.

20 SPEAKER terminals

Connect to an 8–16 ohms speaker system.

Speaker cord connections

Caution

- Make sure that none of the strands are separated from the wire and shorts across the speaker terminals.
 - Correct $\oplus \ominus$ connection of both speakers insures proper in-phase operation. If the speaker system is out-of-phase, the bass tones seem to be missing and the position of the instruments becomes obscure.
 - The set should be placed some distance away from the speakers so that it will not be affected by the speaker magnets. If a temporary proximity to magnets should cause portions of the picture to have poor color, turn the POWER button off, and after about 10 minutes, turn it on.
- The Sony SS-X1A and SS-X10A Speaker System (optional) may be placed near the set because these are a low magnetic flux leakage type.
- Never connect a speaker system to an amplifier and this Component TV simultaneously, as this may damage the TV.

21 AC OUTLET (SWITCHED).

Provides ac power of 200 W max. (KX-2501A) or 250 W max. (KX-1901A) to other connected equipment. Power can be switched on or off with the POWER button on the Component TV.

Caution

- When the set is used with a Sony Component TV tuner, do not connect the ac power cord of the tuner to this outlet. Otherwise, the power cannot be turned on or off using the control on the tuner or the Remote Commander (supplied with the tuner).

- Do not connect electrical home appliances such as an electric iron, fans, or other high-wattage equipment to this outlet.

22 AC power cord

Connect to a convenient 120 V ac wall outlet.

When the set is used with a Sony Component TV tuner, the ac power cord may be connected to the UNSWITCHED AC OUTLET.

23 POWER LOCK switch

Normally set to OFF.

The MASTER and POWER buttons functions as described above. If the set is to be switched on or off by a timer, set this switch to ON and keep the MASTER button pushed in. When power is supplied to the set with the POWER LOCK switch and MASTER button set to ON, the set will turn on automatically.

24 BASS BOOST switch

When a bookshelf-type speaker system (e.g. Sony SS-X1A, SS-X10A) is used, set this switch to ON to enhance the bass sound. When a larger speaker system is used, set the switch to OFF to prevent excessive bass boost.

25 Speaker attachment holes

The Sony SS-X1A Speaker System (optional) may be attached to the set. For details on attachment, see the instructions furnished with the SS-X1A.

SECTION 2 DISASSEMBLY AND REPLACEMENT

2-1. FILTER REMOVAL

2-2. FOR CHECKING B BOARD UP

2-3. CONTROL BLOCK REMOVAL

2-4. FOR CHECKING

2-5. PICTURE TUBE REMOVAL

SECTION 3 SAFETY RELATED ADJUSTMENTS

3-1. HOLD DOWN ADJUSTMENT

R532 ADJUSTMENT

When replacing the following components, make this adjustment.

Q510, Q511, R537, R545, R567, R551A, R532, R538, R588, R561, R552, R540, R541, R508, R590, R569, D514, D501, D502, IC501.

1. Feed in a dot pattern signal from pattern generator.
2. Set the variable auto transformer to 120V ac and PICTURE, BRIGHT control to minimum.
3. Pull out BA-11 plug and short circuit between the pin ① and ② of BA-11 plug with a jumper.
4. Supply the $18.2 \pm 0.1V$ dc to the terminal of BA-11 ③ with the regulated-dc power supply and confirm that the HV hold down circuit operates.
(When the HV hold down circuit operates raster disappears.)
5. Supply the $17.3 \pm 0.1V$ dc to the terminal of BA-11 ③ with the regulated-dc power supply and confirm that the set is normally operated.
6. PICTURE, BRIGHT controls to maximum connect the BA-11 plug.
7. If step 1 – 5 are not satisfied, select the resistance value of R532 and repeat above step.

Note: As soon as the HV hold down circuit operates, turn the POWER switch to OFF.

SECTION 5 EXPLODED VIEWS

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.

- Items marked "▲" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

The components identified by shading and mark ▲ are critical for safety. Replace only with part number specified.

SECTION 6 ELECTRICAL PARTS LIST

BD

NOTE:

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

• Items marked " **A** " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

When indicating parts by reference number, please include the board name.

• All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

CAPACITORS
• MF : μ F, PF : μ μ F

RESISTORS
• All resistors are in ohms
• F : nonflammable

COILS
• MMH : mH, UH : μ H
